

Hi Val

Can I first say that the climate change agenda is very important and I am glad you noticed that the Labour Group wanted it to be a top priority in the new council

1. Climate change will have a great impact on Shropshire we live in one of the most rural parts of the country and climate change will have an impact on our wildlife.

Climate change will also have an impact in the town with the river Severn flooding more often.

The council needs to do more to get homes and businesses in Shrewsbury to improve on energy consumption by doing a campaign on turning off appliances such as computers replacing light bulbs with energy saving ones and to give every house a free energy check

2. if elected yes I would support inclusion of climate change as one of the councils top ten priorities

3. I think that a department in the council should be set up to work with schools, businesses and families at home to show how much money can be saved by recycling

we need a campaign to get supermarkets to have recycling just on the way out of the shop not across the car parks in some corner

We need to give council tax cuts for people who recycle and don't need to have their waste bin emptied!!

4. In rural areas we need to make sure that any planning for houses has the support of jobs within the area we need to work with the developers to make sure that they help the communities by making the houses more efficient and for the developers to build shops within the plan.

More must be done to get businesses such as Royal Mail Tesco's who go to these areas every day to provide more services such as picking up people who need to go into town.

And as for the incinerator I have always been against this there are other ways and we must make sure this does not go ahead

I also fully endorse everything Alan Mosley has said as a Labour group. We will work hard to look after all the people in Shropshire

I hope that this helps I have been working all night and I am sorry I don't have the time.

Thank you for getting in touch

Best Wishes]

Jon
